VM50 Adaptor

If you wish to use screw terminal connections for the 24 programmable I/O, Compumotor offers the VM50 adaptor (p/n VM50). Screw terminal connections for both the 24 inputs and the 24 outputs will require two VM50 adaptors.

The pin numbers on the VM50's screw terminals correspond to the same pin outs on the Programmable Inputs and Programmable Outputs connectors. The VM50 simply attaches to the controller via the 2-foot, 50-pin ribbon cable that comes with the VM50 (see figure on right).
