

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

LPS-C Sensors with STARNODE Data Logger

Laser Particle Sensor For Cleanroom Monitoring

The Laser Particle Sensor, Model LPS-C is a family line of compact sensors for measuring airborne particles. These sensors offer an efficient method for monitoring cleanroom environments on a continuous basis. The small footprint of the LPS-C makes it suitable for particulate sampling on level surfaces of workstations or where space is at a premium.

Sizing sensitivities for the LPS-C particle sensors are available at 0.2, 0.3, and 0.5 microns with a flow rate of 1.0 and .1 CFM using an external vacuum pump. Data collection from the LPS-C is provided by the STAR NODE data logger. This data logger is designed to collect information from up to eight LPS-C sensors and communicates with a facility monitoring system on a local area network with RS485 capabilities. Power for the LPS-C models can be provided by either the STAR NODE or an individual power supply.
