Peco Controls

Advancing Food and Beverage Safety With X-Ray Inspection

FillTrac

Package Inspection System

- Variable high speed operations (3000 cpm)
- Remote access for maintenance and set-up support
- Multiple ejector options
- Inspection options for cap presence, cap orientation, and label presence

FillTrac Fill Level Inspection System

The FillTrac Fill Level Inspection System integrates Peco's 30 year experience in fill level inspection with the latest in technology to provide the best inspection available in a compact, easy to use, and environmentally sound, design.

Typical Applications

Confirmation of Contents

Confirmation of labeled contents in beverage containers including glass bottles, PET bottles, metal cans, and composite containers.

Verification of Head Space

Verification of minimum head space in food cans for thermal processing requirements.

Fill Level Evaluation

Monitor average fill levels for evaluation of filler performance.

Minumum Solid Contents

Assure minimum solids contents in multiple fill processed food applications.

Checking for Underfill and Overfill

Checking for underfill and/or overfill in all liquid packaging including personal care products, automotive additives, garden supplies and cleaning agents.

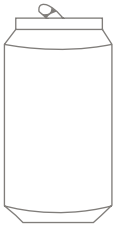

Supported Containers

Metal Cans

Glass Bottles

Metal Cans

Simple Glass Jars (limited punt)
