PNEUMATIC PRESSURE REGULATORS

NON-VENTED REGULATORS

6061 Aluminum

316 Stainless Steel

SELF VENTING REGULATORS

6061 Aluminum

316 Stainless Steel

Used in our facility as a basic **"knock down" regulator**, these corrosion-resistant, piston type, pneumatic regulators are ideal for applications requiring a low cost solution to a common industrial need; **the first stage in reducing the pressure of inert bottled gases or compressed air to a manageable level**.

Perma-Cal® Models 62 and 64 series pressure regulators have a unique "deep seat" design which creates a balanced valving action, promotes positive sealing, self compensates for wear, and virtually eliminates leakage over the entire operating life of the regulator. Standard wetted parts are 316 stainless steel or 6061 aluminum with Kel-F® or Teflon™ seat material and Viton® or Buna-N seals.

Maximum inlet pressures up to 6,000 PSIG are possible with a 316 stainless steel body; 3,000 PSIG with an aluminum body. Except for the 6,000 psig inlet model, the minimum burst pressure is 10,000 psig or 4 times the maximum inlet pressure whichever is greater. For the 6,000 psig inlet model, the minimum burst pressure is 15,000 psig.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
