ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

PZE X4

Contact expansion module for increasing the number of available contacts

Approvals

	PZE X4
cULus LISTED	◆
TÜV SÜDDEUTSCHLAND	◆
CCC	◆

Unit features

- Positive-guided relay outputs:
  – 4 safety contacts (N/O), instantaneous
- Safe separation of safety contacts 13-14, 23-24, 33-34 from input circuit A1 and feedback loop Y1-Y2
- Connection for feedback loop
- Switch status channel 1/2
- See order reference for unit types

Unit description

The unit meets the requirements of EN 60204-1 and IEC 60204-1. The contact expansion module is used to increase the number of contacts available on a base unit. Base units are all

- Safety relays with feedback loop
- Programmable safety systems with feedback loop

The category that can be achieved in accordance with EN 954-1 and EN ISO 13849-1 depends on the category of the base unit. The contact expansion module may not exceed this.

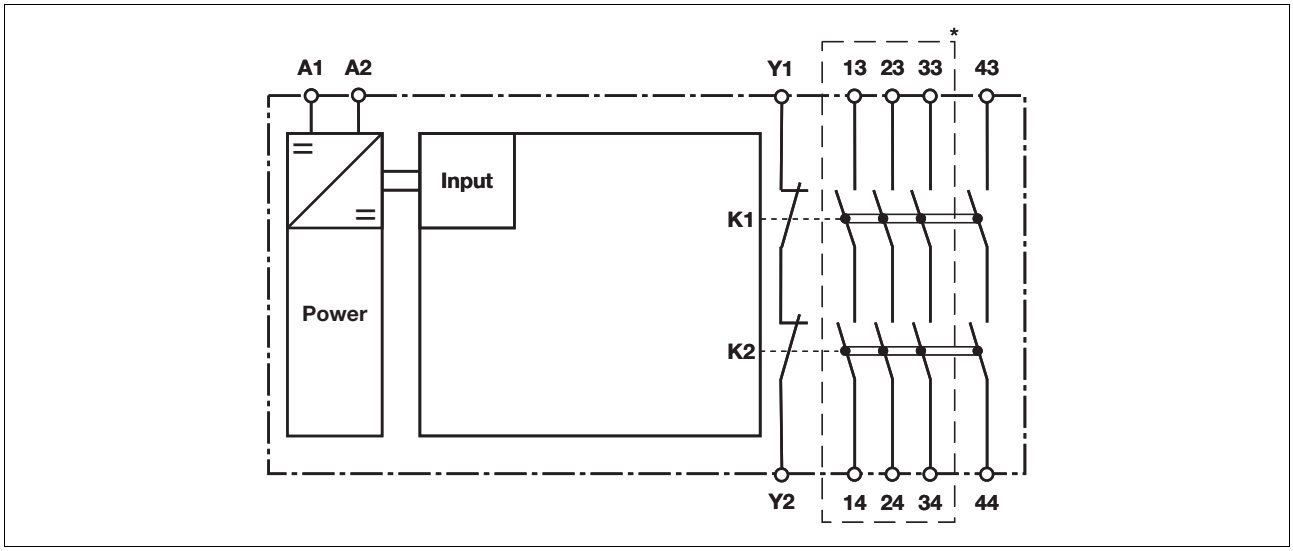

Safety features

The unit meets the following safety requirements:

- The contact expansion module expands an existing circuit. As the output relays are monitored via the base unit's feedback loop, the safety functions on the existing circuit are transferred to the contact expansion module.
- The safety function remains effective in the case of a component failure.
- Earth fault in the feedback loop: Detected, depending on the base unit that is used.
- Earth fault in the input circuit: The output relays de-energise and the safety contacts open.

Block diagram

* Safe separation in accordance with EN 60947-1, 6 kV (see unit features)

PZE X4

Function description

- Single-channel operation: one input circuit affects both output relays

Timing diagram

Key

- Power: Supply voltage
- Input: Input circuits A1
- Output safe: Safety contacts 13-14, 23-24, 33-34, 43-44
- Feedback: Feedback loop Y1-Y2
- t_1: Switch-on delay
- t_2: Delay-on de-energisation

Wiring

Please note:

- Information given in the “Technical details” must be followed.
- Outputs 13-14, 23-24, 33-34, 43-44 are safety contacts.
- To prevent contact welding, a fuse should be connected before the output contacts (see technical details).
- Calculation of the max. cable runs l_{max} in the input circuit:

$$l_{max} = \frac{R_{lmax}}{R_l / km}$$

R_{lmax} = max. overall cable resistance (see technical details)
R_l /km = cable resistance/km

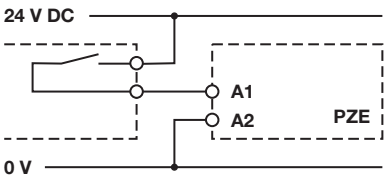

- Use copper wire that can withstand 60/75 °C.
- Sufficient fuse protection must be provided on all output contacts with capacitive and inductive loads.

PZE X4

Terminal configuration

Installation

- The safety relay should be installed in a control cabinet with a protection type of at least IP54.
- Use the notch on the rear of the unit to attach it to a DIN rail.
- Ensure the unit is mounted securely on a vertical DIN rail (35 mm) by using a fixing element (e.g. retaining bracket or an end angle).
