ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

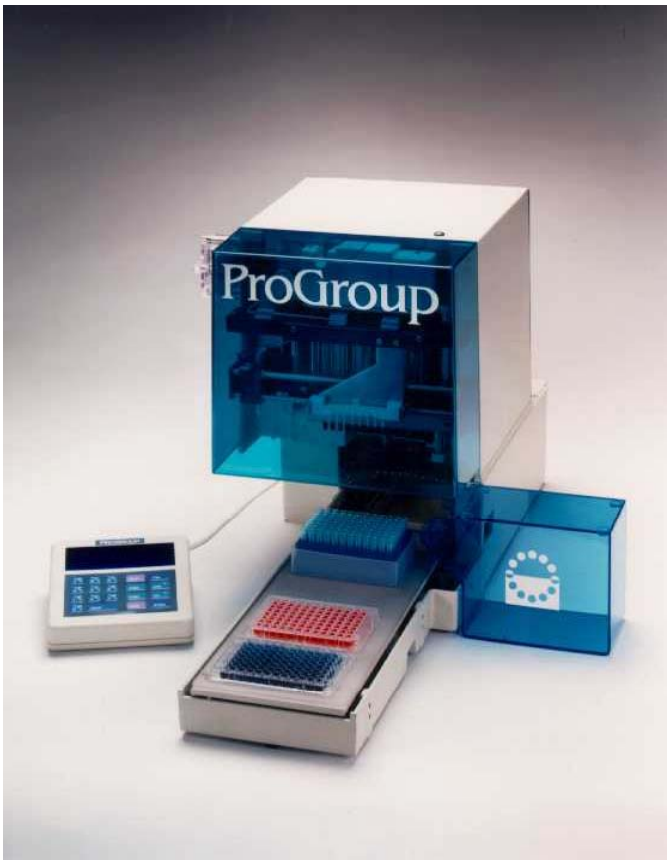

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

ProGroup Instrument Corp

Wellpro 384*Automated Diluting, Pipetting, Dispensing* Wellpro 96

- Serial Dilution
- Reagent Addition
- Plate Replication

Proven Reliability, Accuracy and Speed, taken to the Next Level!

High throughput screening quickly becomes low throughput if your liquid handling is slow, complicated, or unreliable. Eliminate your slowest processes with the Progroup Wellpro 96 for 96 well plates and the Wellpro 384 for 384 well plates.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

The Wellpro is designed specifically to elminate tedious hand pipetting and complicated slow robotic protocols. With the Wellpro, you can easily and quickly move liquids from microtubes or bulk sources to microplates, then dilute, mix transfer or add any variety of reagents required by your protocol. Mother-daughter plate replication and plate filling procedures are just as fast and simple.

Start your procedure in minutes… not hours.

Ease of programming is a primary feature of the Wellpro. There are no complicated position calibrations or "teaching procedures". Executable files are easy to make, and yet the most challenging procedure can be accommodated by easily linking stored files.

Key features of the Wellpro 96

- 96 Well format design allows much faster processing speeds, simplicity of use, and greater reliability.
- Serial dilutions in almost any ratio in microplates or micro tubes, in either 8 or 12 channel format
- Exceptional precision is achieve through a broad range of liquid volumes (1µl to 200µl in 1µl increments)
- Plate to plate or microtube to microtube replication or transfers
- Plate filling from bulk containers
- Eliminates cross contamination with disposable pipette tips. Now available with **high-quality Wellpro Tips**.
- Handles 96 well standard, shallow, deepwell, U, V and flatbottom plates, as well as 96 format microtubes
- Fits into a standard biohazard cabinet or fume hood

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

At Last, Microvolume Testing is Made Practical with the Wellpro 384

Progroup Instruments brings fast, easy, accurate and consistent liquid handling to 384 well plates with the Wellpro 384. Pure 384 technology enables the Wellpro 384 to process 384 well plates with unequalled speed, precision and reliability.

Key features of the Wellpro 384:

- 384 well format design allows much faster processing speeds, simplicity of use and greater reliability
- Serial dilutions in almost any ratio in microplates or deep well plates, in either 16 or 24 channel format
- Exceptional precision is achieved through a broad range of liquid volumes (1µl to 50µl in 1µl increments)
- Plate to plate or microtube to microtube replication or transfers
- Plate filling from bulk containers
- Eliminates cross contamination with disposable pipette tips. Available with high-quality Wellpro Tips
- Handles 384 well standard, shallow, and deep well plates
- Fits into a standard biohazard cabinet or fume hood

Wellpro 96 and Wellpro 384

Robust construction and simplicity of design result in high speed, exceptional accuracy and enduring quality. Eliminate those liquid handling bottlenecks in your processes. Allow a Wellpro to perform your most demanding liquid handling requirements.
