Combination SPDT/Multiplexer

- ◆ **Ideal for General-purpose Switching and Multiplexing**
- ◆ **Switches Signals up to 1A and 250VDC or ACrms**
- ◆ **Easily Configured to Meet User-defined Network Requirements**
- ◆ **40 SPDT and 8 1x6 MUX**

Racal Instruments 1260-37 contains 40 Form C (SPDT) switches and eight 1x6 multiplexers.

The multiplexers can be expanded using the on-board jumpers to four 1x12, two 1x24 or one 1x48 two-wire channels.

The module's unique combination of a signal multiplexer and independent switch channels provides for a significant portion of your switching needs in a single VXI slot and saves valuable space within your chassis.

Relay coils are monitored to provide user selectable confidence checking which gives the user additional assurance of proper relay operation. The 1260-37 is controlled by the Option 01 message-based interface.
