PMC239/F

PCI to PMC Adapter

Features

- 32 and 64-bit PCI
- Generates the +3.3V power for the PMC
- Supports both 5V and 3.3V signaling
- PCI edge connector style card to PMC (IEEE 1386) Adapter
- 1 MagLev type fan (5V, 1W)

The PMC239/F is a PCI to PMC adaptor card. It has a PCI edge connector style that fits into a 32 or 64-bit PCI slot.

The PMC239/F accepts both 3.3V and 5V signaling PMC cards. It can be plugged into both 3.3V and 5V signaling PCI slots. However, if a 3.3V-only signaling PMC is installed on the PMC239/F, the adapter can not be installed in a 5V-only PCI slot. This also holds true for the converse.

PMC239/F adapter card can be used to provide a connection between a host PCI bus and a PMC card. The card also provides an extra connector that is suitable for debugging purpose for the PMC card. The extra connector maps 64 bits of user I/Os to one of the PMC connector (P4). In addition, PMC239/F provides a MagLev type fan (5V, 1W) for cooling the PMC card.

PMC239/F PCI to PMC Adapter

Specifications

Form Factor

- PMC

PCI Bus Characteristics

- Specification: 2.2
- Signaling: 3.3V & 5V
- Speed: 33/66 MHz
- Width: 32/64

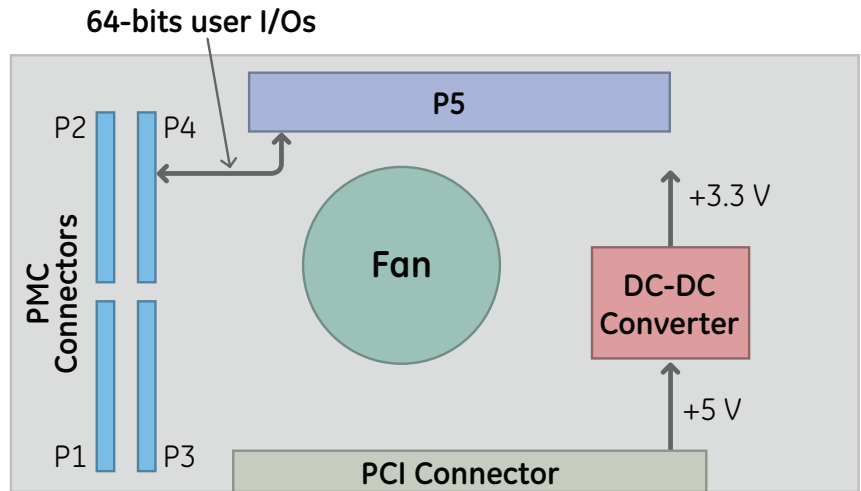

Power

- 1 watt
- @ 5V: 0.2 A

Temperature

- Operating: 0 °C to +60 °C
- Storage: -40 °C to +85 °C
