Straight styli are designed to inspect simple features where direct, unobstructed contact with a measured surface is possible. A stainless steel stem offers excellent rigidity and is ideal for applications where weight is not critical. Ruby is regarded as the industry standard for stylus tips. It is one of the hardest materials available and suitable for most applications. Due to adhesive pickup, ruby tips are not recommended for scanning aluminium parts.

REVO recommended stylus, with RSH175, RSH250 and RSH450 module.

Technical table

Ball diameter (mm)	3
Centre styli	N
EWL (mm)	17
Holder material	Stainless steel
Is Rohs Compliant	Compliant
Overall length (mm)	20
Stem diameter (mm)	1.5
