## **Universal I/O Chassis and Power Supply Chassis**

Catalog Number 1771-A1B, -A2B, -A3B, -A3B1, -A4B, -PSC

### **Plating Standard and Process Changes Appearance of Chassis**

A change to the plating on the 1771 chassis has changed its appearance, but will not affect its functionality.

The new plating process has been tested to verify that the chassis performance has been maintained.

The new plating is part of Rockwell Automation's ongoing efforts to comply with current and emerging environmental standards. The change helps Rockwell Automation to ensure long term availability of PLC-5 and 1771 I/O products.
