ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

SLC™ Programmable Controllers

EEPROM Memory Module – Catalog No. 1745-M1

The EEPROM Memory Module

The EEPROM is a non-volatile memory in convenient modular form, for use with SLC 100 and SLC 150 Programmable Controllers.

A Series B module or a Series A module having a 28-pin chip must be used with the SLC 150 processor unit. The majority of Series A modules sold in the past meet the 28-pin chip requirement.

Specifications

Memory Type:
Electrically-Erasable Programmable Read-Only Memory (EEPROM).

Memory Size: 1200 words maximum.

Ambient Temperature Range:
0° to 60° C (operating). – 40° to 85° C (storage).

EEPROM Program Identification

Since EEPROM modules can be inserted in any SLC 100 or SLC 150 processor unit, it is important that you identify each EEPROM with the particular program it contains and the controller or controllers it is to be used with.

Caution: Interchanging programs between controllers could cause improper operation and equipment damage. You must be especially cautious when interchanging programs between SLC 150 and SLC 100 controllers, because of differences associated with certain internal addresses and other variations.
