Our signaling devices are available in two types:

- Audible Devices
  Including general and high-performance electronic horns, panel mount signaling alarms, and hazardous location horns and beacons.
- Visual Devices
  Including panel mount xenon strobes, mini square beacons, panel-mount with selectable steady or flashing light indicators, wall-mount signal lights, panel light bars, industrial round beacons, tower lights, stack lights, and panel-mount dual circuit alarms.

Our signaling devices are designed for fast, flexible, and easy installation to save you time with advanced modular assembly and unparalleled performance and reliability.

Bulletin 855P Panel-mount Signaling Alarms

This product line includes sounders, status indicator beacons, xenon strobes, and sounders with status indicator combination and dual-circuit alarms. These alarms significantly reduce panel space requirements and installation time. Our panel-mount alarms are rear-securing and fingersafe, which adds a high level of environmental integrity to your panel.

Bulletin 855L Panel Light Bars

These panel light bars are ideal for OEMs and panel builders who want to reduce the quantity of components without the loss of design reliability or functionality. These devices remove your need for a separate fluorescent lamps purchase. They can be left ON continuously due to low power consumption and minimum heat generation of modern status indicator technology.

Bulletin 855H Industrial Horns

This product line includes general-purpose, high-performance, and recordable electronic horns.

Bulletin 855H — General-purpose Electronic Horns

These devices produce a sound output of 108 dB (A) maximum, which is suitable for most mid-range industrial and institutional, single-status signaling applications. The enhanced version produces sound output of 113 dB (A) max. Our horns have multi-tone and volume control capabilities. You can retrofit the horns directly into most machine panel cutouts or mount them into traditional 10.2 cm (4 in.) electrical back boxes.

(1) Light output values are calculated from the LED Data Sheet and show typical values of luminous density. These values are not exact because the knurling in the lens affects the light distribution and because the viewing angle of the LED that directly relates to the Cd output value, is not identical for all LEDs.

These devices provide reliable, high-performance, high-visibility machine multi-status indication in a cost-effective package. They feature IP66 enclosure rating and is rated for indoor and outdoor use, which makes them an ideal signaling solution for a broad range of applications. With a wide variety of mounting bases available, they can be installed in any orientation — vertical, sideways, or upside-down — to best suit the application. They can be preassembled to save time or ordered as separate light and sound modules for customized field assembly.

Combined Light Modules with Piezo Sounder

All single-circuit modules contain a selected light option with a sound device that operates simultaneously. All two-circuit modules contain two circuits that allow for separate operation of light or sound. The piezo-style sound modules can be switched to pulsing or continuous sound with a DIP switch. Additionally, the volume can be adjusted to either low (92 dB(A)) or high (107 dB(A)), via a DIP switch. UL Type 4/4X/13, IP65.

Table 120 - Decibel Rating (Sound Modules)

Device	Decibel Rating (1)
Selectable Tone Sound Module (SA1, TA1)	Maximum volume ranges from 64…103 dB(A) (volume adjustable) Based on tone that is selected for all settings except signal horn, which has a maximum of 80 dB(A)
Piezo Sound Module (SA2, TA2)	High 97 dB/Low 85 dB, selectable via DIP switch
Piezo Sound Module (SA3, TA3)	High 107 dB/Low 95 dB, selectable via DIP switch
Piezo Light Modules and Light Modules/with Sound (set at continuous or pulsing tone)	High 107 dB/Low 95 dB, selectable via DIP switch

(1) All dB(A) ratings are determined at a distance of 1 m (3.3 ft) from sound module.

Table 121 - Leakage Current Impact

All light modules, sound modules, and light/sound modules can absorb up to 3 mA of leakage current from solid-state outputs without module activation. Some light and light modules with sound may not turn off completely when connected to solid-state outputs that emit leakage current. The following modules can be affected by an output module emitting a maximum of 3 mA. A dry contact can be used to reduce the effect of leakage current.	
12V AC/DC, 24V AC/DC, 120V AC, 240V AC	All light/sound combination modules

These devices give you the flexibility to meet the widest range of applications with a reduced number of components. This system uses a modular design that incorporates brighter LED illumination and a broad offering of sound technologies. All signals in the system are 24V AC/DC powered, which means that just three power modules can cover the entire system. They can be purchased as separate components or as a preconfigured, factory-assembled stack light for optimal flexibility.

Bulletin 855W Wall-mount Signal Light

These devices are designed to communicate the status of different conditions in the machine or critical equipment in a compact size housing. Our signal lights are available in configurations from two to five light indicators with the ability to add the sound in the same unit. These devices provide the versatility to meet your application requirements without any mounting orientation restriction. We offer two color enclosures that allow you to choose the one that best fits the aesthetics of your machine or equipment.

Bulletin 855X Hazardous Location Horns, Beacons, and Combination Units

These devices are designed to alert you to critical equipment and system needs on the plant floor. These alarms are available in a wide variety of light and sound functions, sizes, colors, voltages, and mounting options. These devices are also offered pre-assembled to save time.

- Provides low power consumption and long life
- Offers horn only or horn and attached beacon with six lens colors
- Offers 24V DC, 120V AC, and 240V AC voltage options
- Includes glass reinforced plastic and impact resistant ABS enclosure
- Offers -20...+55 °C (-4...+131 °F) operating temperature for Class 1 Division 2
- NEMA Type 4/4X/13, IP 66/67 certified
- UL listed, ATEX/IECEx certified

These devices are designed to alert you to critical equipment and system needs on the plant floor. These alarms are available in a wide variety of light and sound functions, sizes, colors, voltages, and mounting options. These devices are also offered pre-assembled to save time.

- Provides low power consumption and long life
- Offers horn only or horn and attached beacon with six lens colors
- Offers 24V DC, 120V AC, and 240V AC voltage options
- Includes marine-grade aluminum enclosure with a compact footprint
- Offers -40...+70 °C (-40...+158 °F) operating temperature for Class 1 Division 2
- NEMA Type 4/4X/13, IP66 certified
- ATEX/IECEx, Zone 2 and Zone 22
- Class 1 Zone 2; Class 1 Zone 22
