## Backplane Controller Cards for SBS Technologies 32-Bit PCI Expansion Systems

---

### **Caution!**

- ➔ Static electricity can damage integrated circuit components and cards. Make sure you use proper ESD handling procedures (refer to EIA-625, ESD Association Handbook or MIL-HDBK-263) when working with cards and components.
- ➔ Make sure power is *OFF* and power cords have been disconnected before installing cards in the Expansion Enclosure.

### **Power Requirements:**

- PCI (210-2 or RoHS version 56040-102) and cPCI (212-2) Backplane Controller Cards draw 0.5A at 5V maximum.

### **Environment:**

- Temperature -      0° to 60° C operating;  
                             -40° to 85° C storage.
- Humidity -            0% to 90% non-condensing.

### **Installation Notes:**

- When installing a Backplane Controller Card in a SBS Expansion Enclosure, it must be installed in the Backplane Controller Slot.
- The cPCI Backplane Controller Card must be installed in a system slot.

### **Help!**

- ➔ A part number with card revision level is printed on a white label affixed to the circuit card.

Please have the following items and information handy when calling SBS for technical support:

- Model number and revision level of the Backplane Controller Card.
- Model number and revision level of the Host Card.
- Expansion Enclosure make and model.

- Model number of the Expansion Unit cable.
- Host computer make and model.
- Host system BIOS manufacturer and revision.

Technical support is available from **9:00 a.m. - 5:00 p.m. (Central Time) Monday - Friday**, excluding holidays.

### **FCC User's Information:**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with this instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the users will be required to correct the interference at their own expense.

### **Required Accessories:**

- Shielded Expansion Unit cable.

This accessory is required to be used in order to ensure compliance with FCC Rules. It is the responsibility of the user to provide and use this accessory.

### **Caution To The User:**

The FCC warns that changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
