

## Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

### SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

### *InstraView*<sup>SM</sup> REMOTE INSPECTION

Remotely inspect equipment before purchasing with our interactive website at [www.instraview.com](http://www.instraview.com) ↗

### WE BUY USED EQUIPMENT

Sell your excess, underutilized, and idle used equipment. We also offer credit for buy-backs and trade-ins. [www.artisanng.com/WeBuyEquipment](http://www.artisanng.com/WeBuyEquipment) ↗

### LOOKING FOR MORE INFORMATION?

Visit us on the web at [www.artisanng.com](http://www.artisanng.com) ↗ for more information on price quotations, drivers, technical specifications, manuals, and documentation

### Features

- Directly plug compatible with the V5B/V5C Embedded PCs
- Supports two single, non-extended PMC cards
- +3.3V supply provided for 3.3V PMC cards

The **DPMCC** is a companion to the V5B and V5C embedded PCs which supports PMC expansion interface through a special purpose PCI bridge chip. The DPMCC plugs directly into the connectors of the embedded PC and occupies one adjacent VMEbus slot position. The V5B or V5C and the DPMCC form a single unit module that can be installed in the VMEbus with any PMC non-extended cards, and is supplied with a double-wide face plate to replace the single width faceplate of the embedded PC.

The DPMCC can support PMC cards which use either +5V or +3.3V as their supply voltage. The DPMCC has a DC regulator to supply +3.3V to the permanent +3.3V pins defined by the PMC specification. However, the DPMCC only supports PMC cards which use +5V signaling (I/O) voltage. PMC cards which require +3.3V signaling cannot be used. Per the PMC specification, the DPMCC has voltage keying pins in the +5V position to prevent +3.3V Signal PMC cards from being used.

# DPMCC

## Dual PCI Mezzanine Card Carrier

### DPMCC Specifications

<b>General</b>	Model	DPMCC
	Description	Dual PMC Carrier
	Host Compatibility	V5B or V5C PCI Expansion Connectors
<b>Electrical</b>	Power	+5V Supplied by VME P1, Current Requirement Determined by PMCs
<b>Physical</b>	Size	160mm x 233mm (Dual Eurocard) 6Ux4HP
<b>Environmental</b>	Temperature	0° to 55° Celsius Inlet Air, Operating -40° to 85° Celsius, Non operating
	Cooling	Natural Convection
	Humidity	10 to 90% RH, Non-Condensing
	Shock	6G Max. Operating, 10G Max. Non-Operating
