SedNet™ SD-CPCI-400 and SD-OHCI-CPCI-400 400 Mbps FireWire™ CompactPCI® Adapter

HIGH-SPEED, MULTI-BUS, REAL-TIME COMMUNICATION MADE EASY!

Part of the SedNet™ product family, the SD-CPCI-400 CompactPCI® communication adapter enables high-speed interconnections for heterogeneous real-time systems. Based on the FireWire™ (IEEE 1394) High Performance Serial Bus, the product links any CompactPCI®-based computer to other real-time computing systems. In addition, SedNet™ connects up to 64 computers on the same bus using daisy chain or tree topologies. This cost-saving functionality requires the installation of only one card per computer, versus multiple cards, as required by traditional point-to-point solutions. High design standards and lower prices make SedNet™ the most efficient and cost-effective communication solution for the creation and expansion of real-time computing systems.

Highlights:

- Interconnect [PCI](#), CompactPCI®, [PMC](#) and [VME](#) systems (including IP modules) Without restrictions!
- Full real-time synchronization between all attached nodes
- 400 Mbps asynchronous and isochronous data transfer
- 3U form factor
- VxWorks, QNX, Windows NT 4.0 and to be available shortly: VenturCom RTX support. Please, [contact us](#) for availability.
- Powerful real-time communication API – No need to write device drivers or communication code!
- Three high-speed ports
- Point-to-point, daisy chain or tree topologies
- Interconnect up to 64 computers on the same bus
- Hot Plug and Play
- 32 bit PCI, PICMG 2.0 compliant
