SedNet
The Complete Innovative IEEE-1394 Solution

Back to Hardware Communication Adapters

SedNet™ SD-PMC-400
400 Mbps FireWire™ PMC Adapter

HIGH-SPEED, MULTI-BUS, REAL-TIME COMMUNICATION MADE EASY!

Part of the SedNet™ product family, the SD-PMC-400 PMC communication adapter enables high-speed interconnections for heterogeneous real-time systems. Based on the FireWire™ (IEEE 1394) High Performance Serial Bus, the adapter links any PMC-based computer, to other real-time computing systems. In addition, SedNet™ connects up to 64 computers on the same bus using daisy chain or tree topologies. This cost-saving functionality requires the installation of only one card per computer, versus multiple cards, as required by traditional point-to-point solutions. High design standards and lower prices make SedNet™ the most efficient and cost-effective communication solution for the creation and expansion of real-time computing systems.

Highlights:

- **Interconnect PCI, CompactPCI®, PMC and VME systems (including IP modules) Without restrictions!**
- **Full real-time synchronization between all attached nodes**
- **400 Mbps asynchronous and isochronous data transfer**
- **VxWorks, QNX, Windows NT 4.0 and to be available shortly: VenturCom RTX support. Please, contact us for availability.**
- **Powerful real-time communication API – No need to write device drivers or communication code!**
- **Three high-speed ports**
- **Point-to-point, daisy chain or tree topologies**
- **Interconnect up to 64 computers on the same bus**
- **Hot Plug and Play**
- **PMC 32 bit PCI 2.1 compliant**
