SS4 communications module

Overview

- Communication module which is inserted in the CS7 carrier module

Application

This is used for the most part as an interface to commission a multi-processor system. It is connected to a PC (operator/ programming device) for CFC/CFC test mode or service commissioning.

Design

- This module is inserted in one of the three slots of the CS7 carrier module

Function

- RS 232 interface for a configured USS or DUST protocol

Possible protocols:

- USS for SIMOREG and SIMOVERT drive converters
- DUST1 PC coupling for commissioning, TELEMASTER, program download and the CFC test mode
- DUST3 protocol 3964 of the SIMATIC S5
- The data transmission format can be appropriately modified by inserting an interface submodule (e.g. to adapt to the coupling partners, to increase the noise immunity or for longer cables):

  - interface submodule SS1 for a 20 mA line current

Technical specifications

Technical specifications	
Current consumption	+5 V/300 mA +15 V/100 mA -15 V/100 mA
Space requirement	1 slot on CS7
Weight	0.2 kg
