Socket
Secure Digital Scan Card™ Series 3

World's Smallest Bar Code Scanner, Designed for Palm and Pocket PC 2003

Turn Your Palm PDA or Pocket PC 2003 into a High Performance Mobile Bar Code Scanner

If you're a mobile professional using a Palm PDA or Pocket PC 2003 with an SDIO slot for an application requiring extensive data entry, Socket's Secure Digital Scan Card (SDSC) 3E may provide an incredible increase in productivity.

Using manual or virtual keyboards is the slowest, most error-prone method of entering data into mobile computers. If the data to be entered is bar coded, using a bar code scanner is **50 times faster and 10,000 times more accurate than manual data entry**.

Socket's SDSC 3E brings a new level of affordability and convenience to mobile data collection by combining Socket's Battery Friendly™ SDIO technology with the world's smallest bar code scanner. Just plug the card into your PDA, launch the included SocketScan™ software, and read bar code data into any Windows or Palm application as if it had been typed on a keyboard.

Mobility Friendly® Design

Socket designed the SDSC 3E to be Mobility Friendly — to use minimal power. Drawing only 8.0 mA (26.4 mW) in idle mode, the SDSC 3E lets you operate for hours without having to replace or recharge your PDA's batteries. Plus, the included SocketScan™ software transfers scanned data directly into any Windows or Palm application as virtual keystrokes — no custom programming needed!
