Return to Interface Cards for Modicon

ModConnect

SST 5136-MOD-VME is referenced in the Modicon ModConnect program.

The SST Modicon Card connects your VME computer to a Modicon 800 Series or Quantum I/O network on the S908 network.

Applications

- VME Scanner
- I/O Monitoring and Simulation

Custom Driver Development

The Modicon VME card interfaces with the host processor through shared memory. A documented host memory interface is provided. The card does not require external libraries, which simplifies custom driver development in your chosen operating system. DOS example programs with C source are included with each card to assist you with your software development.

Artisan Scientific - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisan-scientific.com
