

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

SMT365 is based on the 600MHz 64-bit TMS320C6416 Revision1.1 DSP and offers the highest fixed-point processing power ever. Sundance did not stop here and have implemented a scalable solution using Xilinx Virtex II FPGAs. The SMT365 is, from the user's perspective, a faster version of the SMT361 Module and a system can be designed with a mixture of SMT335s, SMT361s and SMT365s on the same Carrier. The SMT365 is supported by the T.I. Code Composer Studio and 3L Diamond RTOS to enable full MultiDSP systems with minimum efforts by the programmers.

Features

Single width module

600MHz TMS320C6416 Fixed Point DSP

4800MIPS peak performance

Xilinx Virtex II FPGAs. XC2V2000-4 in FF896 package.

4 Mbytes of high speed ZBTRAM @ 133MHz using K7N801801b-QC16

Two Sundance High-speed (50MHz, 100Mhz or 200MHz) Bus ports 32 bits wide

Six Comm-ports up to 20Mbytes/s each for InterDSP communications / configuration.

8Mbytes FLASH ROM for configuration/booting

5V tolerant Comm ports and global bus allowing connection to older C40 modules and carrier boards.

JTAG Diagnostics Port

Artisan Scientific - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisan-scientific.com

UTOPIA Connectors

Serial-port Connectors

General purpose I/O Connectors

TIM Global Connector

TIM Standard compatible

12 months warranty

Benefits

The SMT365 provides a flexible platform for the next generations of Telecom systems, Image Processing applications, Medical equipment and Industrial solutions. With the added benefit of the large Virtex II FPGA, the SMT365 will enable pre-processing to be done 'On-the-Fly' before the DSP gets the data. The Sundance provided basic VHDL Core for InterDSP communication use approximately 300k gates of the FPGA with the rest is available for the user. The SHB provides 60 I/O pins each and they are available to the user as general purpose I/O pins and uses the high-speed connector system from Samtec and use the 'Blue Ribbon' cables from Precision Interconnect

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
