

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

The Unplug (HPS) Family

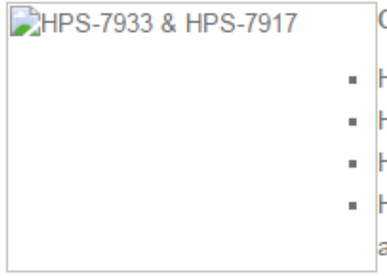

The Unplug product line is a series of products designed to allow you to add up to 128 or 256 serial ports per host adapter to a Unix host machine. Most of the Unplug systems consisted of a host adapter that plugged into the host system and a series of one or more cluster controllers. The clusters are attached to the host adapter via Arcnet (a coax based network). A device driver on the host machine makes the serial ports on the cluster controllers appear as local tty (or hty) ports on the host.

One variation of the Unplug product line was a "multiplexer" product which was essentially the host adapter and a cluster controller combined into a single board, allowing you to add 8 or 16 serial ports to a host system.

The Systech models consisted of primarily the following:

Host Adapters

- HPS-6840 - Multibus I host adapter
- HPS-6940 - Multibus I host adapter
- HPS-6945 - VME host adapter
- HPS-6240 - Multibus I host adapter (higher performance)
- HPS-6245 - VME host adapter (higher performance)
- HPS-6270 - EISA host adapter (not ISA)
- HPS-6270-20 - EISA host adapter (not ISA) (higher performance)
- HPS-6280 - Microchannel host adapter (not ISA)

Cluster Controllers - All RS232

- HPS-7080, HPS-7082, HPS-7088 - the original cluster controllers, DB-25, 8 port, 8 plus parallel port, and 16 port.
- HPS-7080-020,7082-020, 7088-020 - DB-25, downloadable, 8 port, 8 plus parallel port, and 16 port.
- HPS-7080-030, 7082-030, 7088-030 - DB-25, downloadable, 8 port, 8 plus parallel port, and 16 port.
- HPS-7916, HPS-7917, HPS-7932, HPS-7933 - configurable, downloadable, available in a broad range of port types and numbers. 16 and 32 ports, DB-25 and RJ-45, with and without printer.
- HPS-2008, HPS-2016 - "Unplug II", downloadable, in a plastic case, RJ-45 only.

Multiplexers

-
- HPS-6237 - VME 16 port multiplexer, with Parallel port

Miscellaneous

- HPS-5580, HPS-5581, HPS-5582 - SPUR - Arcnet repeater, with 0, 1 or 2 fiber optic connections
- HPS-6237 - VME 16 port multiplexer, with Parallel port
- HPS-3320 - Diagnostic unit

The Unplug systems were sold worldwide directly from Systech and through a number of OEMs. In many cases the cluster controllers were "private labeled" with the OEMs logo and/or company name. Because of this they may appear with other names on various systems. Some of these are called "DTC" products.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
