PMC to PCI Adapter - For Delivery Systems

This PMC to PCI Adapter product from Technobox permits delivery of PMC-derived applications in a standard PCI environment.

Mechanically, a PMC card fits cleanly on a short-length PCI board, resulting in a highly acceptable delivery solution for desktop applications. Effectively, PMC suppliers can introduce products to desktop packaging without having to maintain two PCI-based designs — one for standard PCI and a second for PMC. Note that the inverse — standard PCI boards plugging into VMEbus boards — is mechanically awkward.

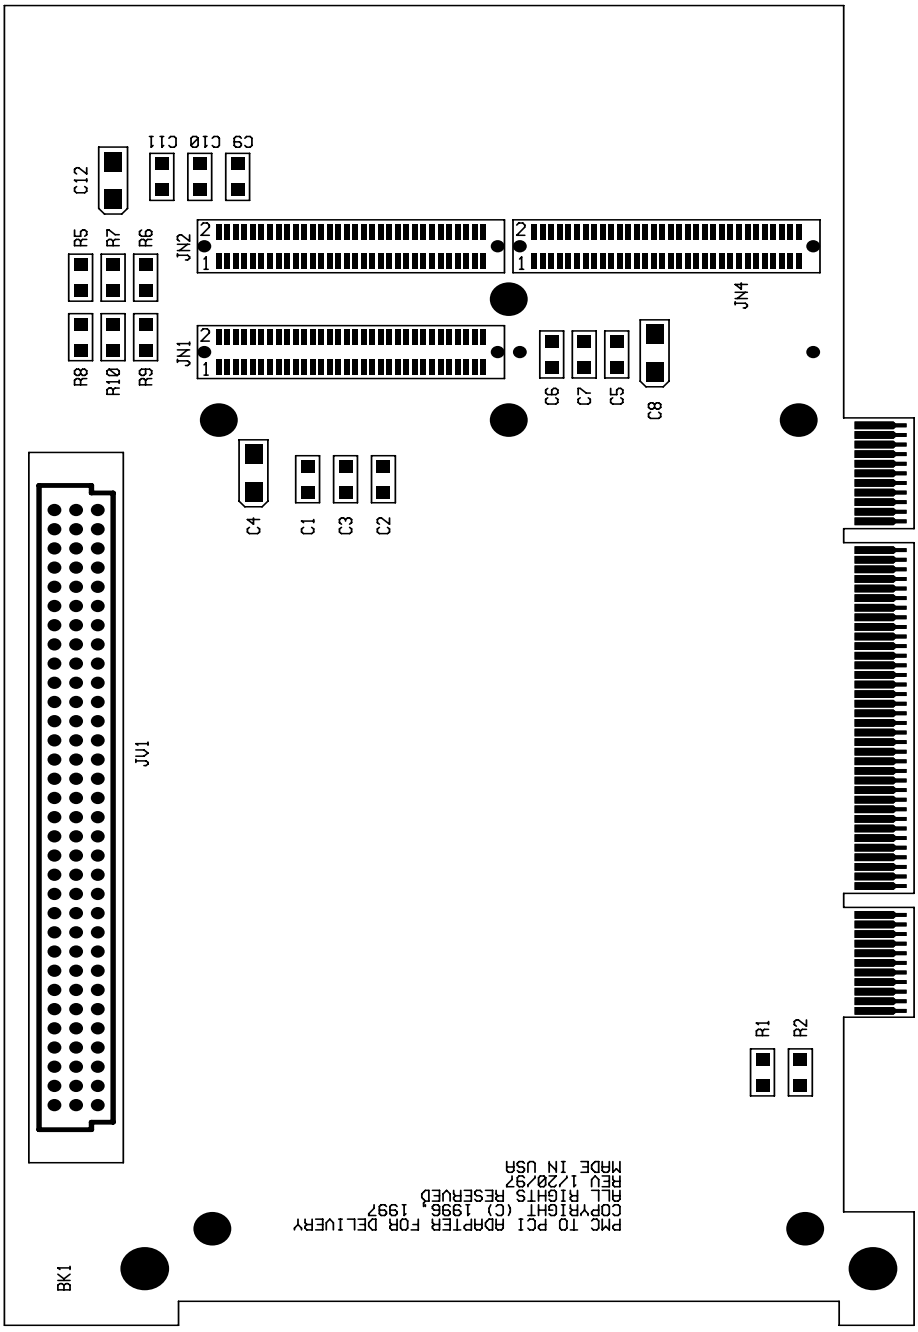

This product was designed to reduce cost. Since it does not have LEDs, clamping diodes, logic analyzer test headers and test features found on other more comprehensive Technobox PMC development tools thus providing cost savings. Also, PMC Side 1 is not accessible for probing.

The A and C rows of a 96-pin DIN connector, located toward the rear of the board, connect with the 64-pin user I/O connector (J4/P4) on the mezzanine card. This connection is specified by IEEE 1386 for the P2 connector on VMEbus boards and permits internal connection of rear I/O, should the PMC board support rear I/O connectivity.

A 2.5 mm thick aluminum panel, with a 0.5 mm chamfered edge, is provided on the PCI board bracket. This mimics the mechanics of a PMC installed on a VMEbus board or other host environment.

To minimize the overall net size of PCI signals, it is recommended that only one of these adapters be installed in a standard PCI-based system. Preferably, the adapter should be located at the endmost PCI slot to minimize stubbing of the PCI bus.

Product Summary

Technobox Part Number:	1447
Typical Power Dissipation:	N/A
Power Supplies Required:	Per PMC under test
PCI Signaling Environment:	3.3 Volt, 5 Volt

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
