Pan And Tilt Head

Pan and Tilt Head Unit:

These units are constructed of the highest quality all metal construction with heavy duty drive blocks, cross roller bearings, worm gears and precision motors to provide a smooth range of movement. Each unit has a lens connector and built-in lens interface board with optional motor drivers for direct connection to motorized lenses. These P/T units can operate in either open or closed loop mode providing a wide choice in control systems. In addition, they can be powered and controlled through the Telemetrics Triax/Coax camera control system.

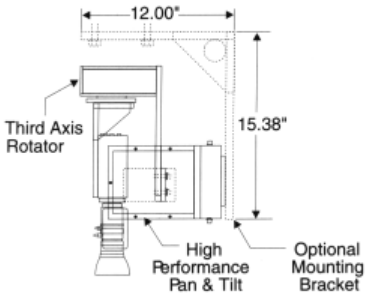

Model PT-HP and PT-HP-S:

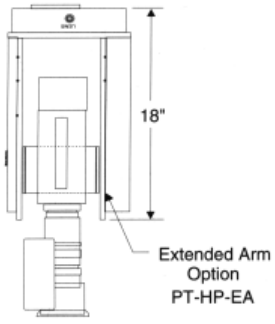

- Industry's first wrap-around cradle for the high performance 3CCD cameras and lenses
- Motors isolation mounted and insulated for whisper quiet operation
- Accurate preset and motion control feedback
- Threaded base for easy tripod mounting, can also be ceiling mounted
- Extended arms and yoke options for optimal tilt range and camera orientation
- Third Axis Rotator Option for camera rotation on its centerline
- Serial/positional version with built-in receiver accepts serial control commands

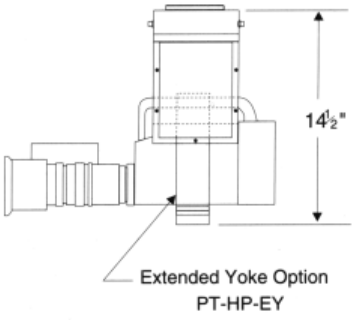

Options:

- Positional Preset - PTO-HP-P
- Extended Yoke - PTO-HP-EY
- Extended Arms - PTO-HP-EA

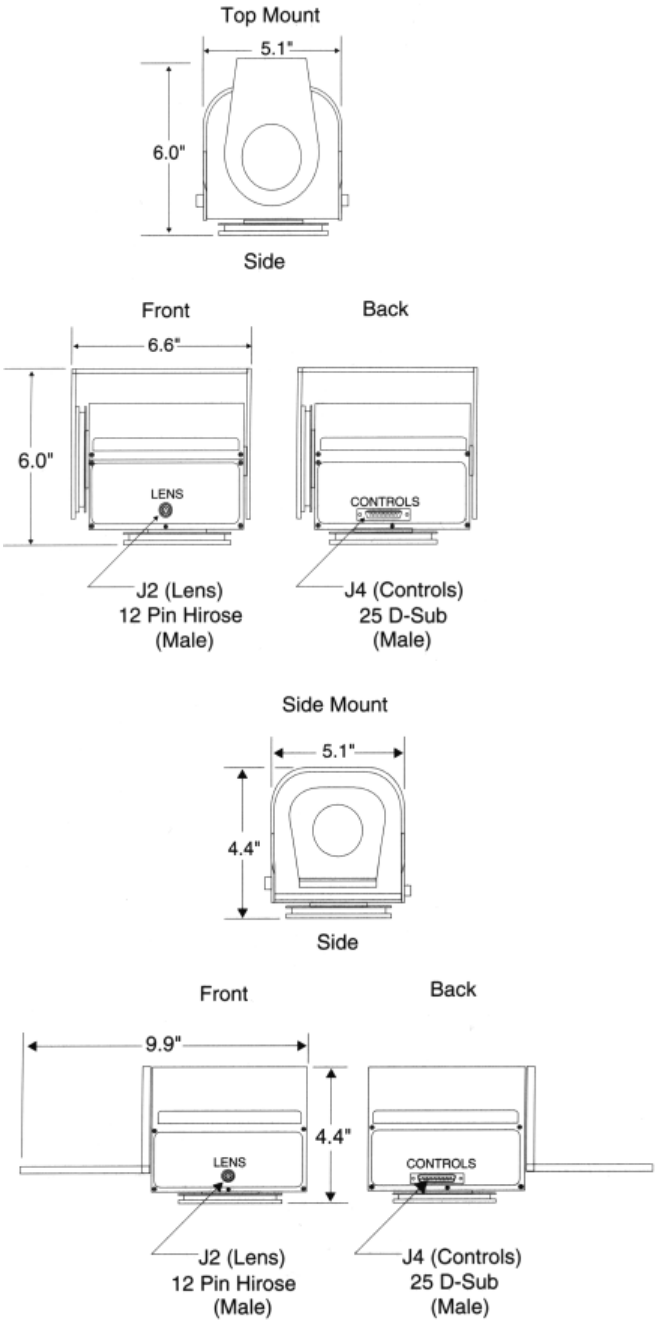

Model PT-CP:

- Designed to accommodate today's compact single and three-chip cameras and lenses
- Side or top camera mounting platform options provide optimal overall size and camera orientation
- Threaded base for easy tripod mounting, can also be ceiling mounted

Options:

- Top Mounting Platform - PTO-CP-T
- Side Mounting Platform - PTO-CP-S
- Positional Presets - PTO-CP-P
