SPECTRA-TECH

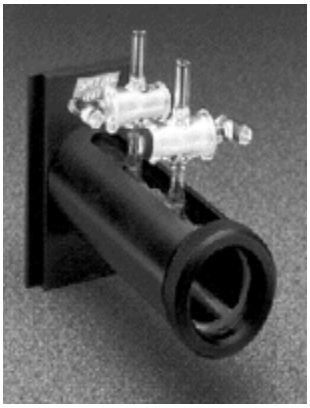

# Gas Sampling

## 10 Meter Gas Cell

**This exclusive Gas Cell is designed for use in industrial settings where simplicity of design defines performance in terms of reliability and ruggedness under demanding environmental conditions. Featuring a unique three component design, optical alignment is always assured and enables the system to be readily disassembled for user cleaning. The Gas Cell features:**

- **Immunity to harsh environments**
- **Leak-tight, VCR connections**
- **Chemical resistivity**

## 50/100 mm Gas Cells

**The demountable gas cells are ideal for high (>1%) concentration gas analysis. Constructed of Pyrex®for chemical resistivity and strength, no metal parts come in contact with the gases. The Standard Demountable gas cells are easy to use and clean. An aluminum sleeve surrounds the cell for protection and O-rings are used for sealing the cell. Two heavy-duty micro stopcocks with port-glass tubing (1/4" O.D.), allow for quick purge and sample change. The Standard Demountable gas cell comes in two pathlengths, 100 mm and 50 mm. These cells use standard 32 mm windows. The windows must be ordered separately.**
