45° Mirror Holder and Adapter

The MA45-2, which is designed to allow our KM100 mirror mounts to be mounted at 45° with respect to an optical bench, is useful when there is a need to change the optical beam height. The beam height of the KM100 kinematic mount, MA45-2, and UPHA base combination is 2.00" (50.8 mm) for the MA45-2 and 50.0 mm (1.97") for the MA45-50/M.

The H45B2 accommodates Ø1"(Ø25.4 mm) optics, such as mirrors or beamsplitters. Optics are held in place with a nylon-tipped setscrew. For beamsplitter applications, a through hole, centered on the optic mount, is provided.
