

## Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

### SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

### *InstraView*<sup>SM</sup> REMOTE INSPECTION

Remotely inspect equipment before purchasing with our interactive website at [www.instraview.com](http://www.instraview.com) ↗

### WE BUY USED EQUIPMENT

Sell your excess, underutilized, and idle used equipment. We also offer credit for buy-backs and trade-ins. [www.artisanng.com/WeBuyEquipment](http://www.artisanng.com/WeBuyEquipment) ↗

### LOOKING FOR MORE INFORMATION?

Visit us on the web at [www.artisanng.com](http://www.artisanng.com) ↗ for more information on price quotations, drivers, technical specifications, manuals, and documentation

## Optical Measurement Products

THE STANDARD OF MEASUREMENT

# System S370 Single-Channel IEEE-488 Compatible Power Meter

## Manual | Specifications

The System S370 Single-Channel Optometer is lightweight and compact for portability, yet has large controls and a convenient, easy-to-read, 16-character LCD screen. Its microprocessor provides step-by-step prompts via the LCD screen as the user programs each test parameter. Add any UDT Radiometric Sensor Head and the System S370 becomes a versatile, simple-to-use radiometer system.

The S370 is controlled with a simple, 10-function keypad, or from a host computer via the IEEE-488 interface. Functions such as sending and receiving data, viewing operational data on the host computer's monitor, and programming the S370, can be performed from a remote location.

Our unique plug-in calibration module enables limitless calibration. The module is an EPROM which is pre-programmed by qualified technicians in UDT's calibration lab. All calibrations are NIST-traceable and multiple modules are also available.

The S370 has five functions that eliminate tedious calculations. In "Linear" the S370 can be used with any linear photodiode. "Log" permits attenuation measurements or measurements relative to a reference level. "Log Ratio" allows the user to set a measurement as a reference level to which other measurements may be compared. "Ratio" takes the ratio of a reference value to subsequent measurements. "Responsivity" permits the user to program the responsivity of any uncalibrated sensor head into the S370. The S370 also offers an analog output and an analog bar graph display on the front panel.

## Performance Specifications

	Linear Mode	Log Mode
Accuracy	±0.2% + 1 count, 10 <sup>3</sup> to 10 <sup>7</sup> range ±1.2% + 1 count 10 <sup>8</sup> to 10 <sup>9</sup> range	±0.2% + 1 count, 10 <sup>3</sup> to 10 <sup>7</sup> range ±1.2% + 1 count 10 <sup>8</sup> to 10 <sup>9</sup> range
Dynamic Range	10 decades	9 decades
Calibration	May be calibrated in multiple units	
Temperature Drift		
10 <sup>3</sup> to 10 <sup>7</sup> range	±0.03% /C°	N/A
10 <sup>8</sup> to 10 <sup>9</sup> range	±0.06% /C°	N/A
dBm, percent of reading, referred to input	N/A	None

### General Specifications

<b>Display</b>	Liquid crystal, 16 characters
<b>Display Range</b>	0000 to 9999
<b>Range Control</b>	Automatic or manual
<b>Output</b>	
Digital	IEEE-488 (drivers available for Lab Windows™)
Analog	±2.5 VDC
<b>Output Connectors</b>	
Digital	IEEE-488
Analog	BNC
<b>Bandwidth</b>	9.0 Hz
<b>Temperature Range</b>	
Operating	0° to +45°C
Storage	-20° to +60°C
<b>Weight</b>	4.0 pounds (1.8 kg)
<b>Accessories Supplied</b>	Power cord, instruction/maintenance manual
