Variable Intensity

TRANSILLUMINATORS

Variable Intensity Mid and Standard Size UV Transilluminators are supplied with corrosion resistant stainless steel surfaces for easy clean-up. **Patented electronic ballasts and universal power supply** with high frequency operation eliminates the hum and flicker typical of magnetic ballasted units, extending tube life. Transilluminators are available in Standard, Mid and Mini platforms, many filter sizes, and single, dual or multi-wavelengths. Two year limited warranty. CE, CSA and FCC approved.

Features

Corrosion Resistant Stainless Steel Surfaces
Patented Variable Intensity Electronic Ballasts
Adjustable UV Safety Shield
Universal Voltage Power Supply
Extended Life Interior Cooling Fans
Even-Illumination, Non-Solarization Filter Glass

All Mid-Size Transilluminators have 100-240V/50-60Hz universal power supplies and are CE, CSA and FCC approved.

Variable Intensity

TRANSILLUMINATORS

Variable intensity allows preparative work to be performed under non-destructive lower intensity UV, but analytical work and imaging under maximum UV.

All Standard-Size Transilluminators have 100-240V/50-60Hz universal power supplies and are CE, CSA and FCC approved.
