9000 Series
Push-On Cross Strap Module

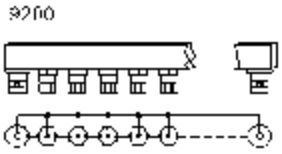

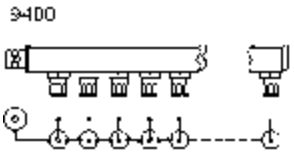

Features:

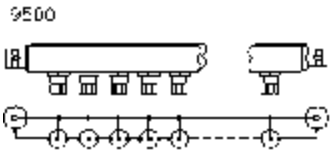

- Interconnects Matrix 70000 series coaxial relays to form Blocking Type Matrices
- Bi-directional
- Push-On configuration
- Machined coaxial / triaxial construction
- Low EMI
- All BNC female junction box available Contact factory

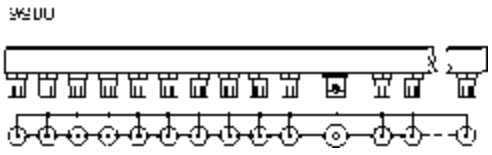

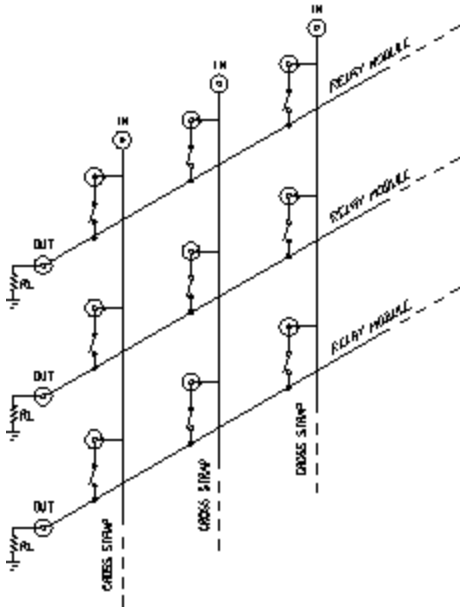

Application Note: Blocking Matrices

The 9000 series cross straps are used to configure blocking type matrices. These type matrices are bi-directional and they are normally used in applications that do not require more than one output to be simultaneously connected to an input. It is possible to connect multiple ouputs to an input however the input will be loaded accordingly. Blocking type matrices are often used in ATE applications where a hard contact is needed.
