Mineralight and Blak-Ray Ultraviolet Lamps for Mineral, Gem and Lapidary Applications

Ultraviolet Hand Lamps

UVP has a large selection of ultraviolet hand lamps to accommodate many applications and budgets. Uses vary from rock and mineral identification to sterilization. UVP has a lamp to fit your needs. Refer to High Intensity/Display Lamps section for other models.

SW	SHORTWAVE	254nm
MR	MIDRANGE	302nm
LW	LONGWAVE	365nm

NEW 4, 6 and 8-Watt EL Series UV Hand Lamps

UVLMS-38 UVLS-28 UVL-14

NEW The EL Series Lamps cover a wide selection of lamps - 4 watt, 6 watt and 8 watt lamps available with longwave, shortwave or midrange ultraviolet or white light (or a combination of light sources in one lamp)! Different styles from which to choose:

- The basic configuration houses one UV and one white light tube -- **the advantage of white light or UV illumination from one unit!** Use white light when working with materials in a dimly-lit area. A selector switch located on the lamp back makes it easy to change form one light source to the other.
- Selected models use two tubes of the same wavelength. Both tubes operate at the same time, giving added ultraviolet intensity.

- The **2UV Models** use two different wavelengths (shortwave and longwave), providing flexibility for a variety of applications.
- The **3UV Model**, available only in the eight watt lamp, gives **three wavelengths in one lamp** (shortwave, midrange and longwave)! No other lamp offers this versatility. Easily switch among the three wavelengths as your application requires.

EL SERIES ON J-138 STAND

All EL Lamps can be placed in the J-138 Lamp Stand for hands-free operation. This stand is particularly useful for maintaining the UV lamp in its proper position, while viewing or photographing fluorescent minerals, etc. UVP's new C-65 Viewing Cabinet accommodates one or two of the 8 watt EL Lamps for illuminating specimens in darkroom conditions. The C-10E Viewing Cabinet is designed for use with 4 watt EL Lamps

Four-Watt UV Lamps

UVG-4

UVL-4

UVSL-14P

Mini 4-Watt UV Lamps are great for portability as these lamps are battery operated. Lamps are small enough to fit in a pocket. Models to choose from include longwave, shortwave and longwave/shortwave combination. Lamps features:

- A nylon strap is attached for easy carrying
- 4 AA batteries (order separately)

UVG-11

Compact 4-Watt UV Lamps fit comfortably in the hand. This lamp is available in 115V or 230V versions with UV models the same as the Mini UV Lamps above. Additionally, the Compact UV Lamp comes in a 12Volt style (two 6-volt batteries) which is designed for windshield curing.

UVG-11 ON J-124 STAND

Use Compact UV Lamps with specially designed lamp stand (J-124) or the C-10 Chromato-Vue Viewing Cabinet for viewing materials in a darkened environment. The J-124 stand is particularly useful for maintaining the UV lamp in its proper position, while viewing or photographing fluorescent minerals, etc.

Handheld Six-Watt UV Lamps

UVGL-55

Handheld UV Lamps come with an ergonomically-designed handle. Lamps are lightweight. Models available: shortwave, longwave or a combination shortwave/longwave version.

Five versions of six-watt lamps are designed for different applications:

- UVG-54 Shortwave
- UVGL-55 Shortwave and Longwave
- UVL-56 Longwave
- UVM-57 Midrange
- UVGL-58 Shortwave and Longwave

UVGL-55 ON J-129 STAND

Use these lamps with the J-129 Lamp Stand or the C-10 Viewing Cabinet. The J-129 stand is particularly useful for maintaining the UV lamp in its proper position, while viewing or photographing fluorescent minerals, etc.

Portable Six-Watt UV Lamps

UVGL-48

Portable Six-Watt UV Lamps are also battery operated - choose from either standard or rechargeable 6-volt batteries. The battery charger (12V float battery charger) is for use with the rechargeable batteries. The distinctive wrap-around lamp handle comfortably balances the lamp in your hand. A built-in flashlight is included.

- UVGL-48 Multiband SW/LW
- UVG-47 Shortwave
- ML-49 Longwave

UVSL-26P

Rechargeable Six-Watt UV Lamps come equipped with an internal gel-based, lead-acid battery which can be charged for field operation. A 12V adapter is available for recharging the lamp from a car cigarette lighter. These lamps also can be operated from a standard wall outlet. The C-10P Viewing Cabinet securely holds a Rechargeable UV Lamp, providing a convenient portable darkroom.

- UVL-26P Longwave
- UVS-26P Shortwave
- UVSL-26P Longwave/Shortwave
