Valleylab Footswitch Controls

Monopolar and bipolar power at your command

STANDARD BIPOLAR FOOTSWITCH (E6009)

allows for independent control of bipolar output with all Valleylab Force series generators.

DOME STYLE BIPOLAR FOOTSWITCH (E6019)

may be activated from any angle and has a 15 foot cord. Allows for independent control of bipolar output with all Valleylab Force series generators.

NEW LOW PROFILE MONOPOLAR FOOTSWITCH (E6008B)

is designed specifically for Valleylab full powered generators. Manufactured of high quality cast aluminum and features highly visible color coded foot pedals for safety. It also features a non-skid rubber base, water resistant strain relief connectors, and a divider bar between the CUT and COAG pedals.

MONOPOLAR FOOTSWITCH (E6008)

is designed for Valleylab full powered generators. Safety features include a water resistant design, a divider bar between the CUT and COAG pedals, and a non-skid rubber base. It also includes a water-resistant strain relief connector.

HIGH QUALITY

makes Valleylab the world leader in electrosurgical technology. These durable footswitches are manufactured to the highest standards of quality for exceptional performance and reliability during surgery.
