

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

NOTES:

1. No discounts provided on repairs
2. All "A" components will be verified to factory minimum specifications and reused in the renew process.
3. All “A1” items will be verified for use and if not usable will be replaced with new
4. All "B" components will be replaced with new in addition new CRT fluid will be used in the renew process
5. Any part that can not be reused, will be replaced with the exception of parts that are mishandled, abused, damaged in shipping or otherwise damage beyond the control of VDCDS
6. All new, exchange and renew CRTs carry a 1-year warranty excluding phosphor degradation.
7. Exchange w/Renew CRTs are based on availability and not normally stock
8. Repair turn-around time is nominally 30-days or less
9. All Exchange options pricing is based on the new price amount and an Return Material Authorization (RMA) will be issued for credit upon receipt of the depleted assembly

CRT Illustration Example (Marquee 9” Shown)

CRT Disposal Program

The CRTs supplied in the projection systems contain lead in the glass funnel of the CRT. While the CRT as a finished item is not toxic to handle, the lead leaches out of the glass over the many decades during which the glass disintegrates if disposed in a landfill. Thus, it is illegal to dispose of CRTs in a landfill.

The law requires the end-user to properly dispose of the CRTs by either disposing of the CRTs via an authorized environmental recycle facility or to return them to the supplier who in turn has a legal obligation to properly dispose of them.

Video Display Corporation as the worldwide supplier of new and renew CRTs to Panasonic, Sony, Hitachi, et all and has agreements with these companies whereby they ship their reject CRTs prepaid to VDC for either rework or proper disposal. VDC has a contract with a company in New York with whom it ships trailer loads of scrap CRTs each year at a price of ~$11,000/load plus freight. Of interest the recycling company grinds the glass for resale to a glass manufacturer who buys the ground glass at a nominal price for cutlets used to start up a furnace run of new glass. Thus the glass is largely recycled.
