Elevating Tables

UniSlide Series B29, B49, and B69

Although most UniSlide Assemblies can be used in a vertical position, some applications require greater strength and rigidity, and more overall versatility. UniSlide Elevating Tables are designed for these applications.

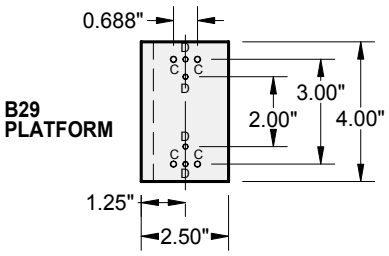

Because the dovetail base is freestanding, B29, B49 and B69 Series Elevating Tables use the deeper "B"-type cross sections for greater rigidity. See page 1.54. The standard lead screw is the W1, with 0.100" revolution. Each Elevating Table features a convenient top-mounted knob for easy table height adjustment, and has a large, stable base plate and a right angle platform secured to the slider. This right angle platform may be removed and remounted in an inverted position. This platform can also be purchased separately.

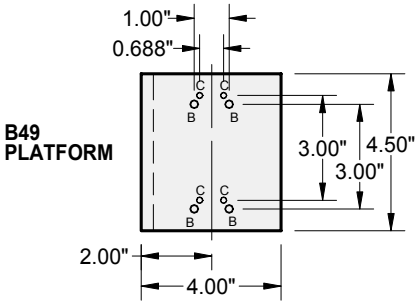

Available Options

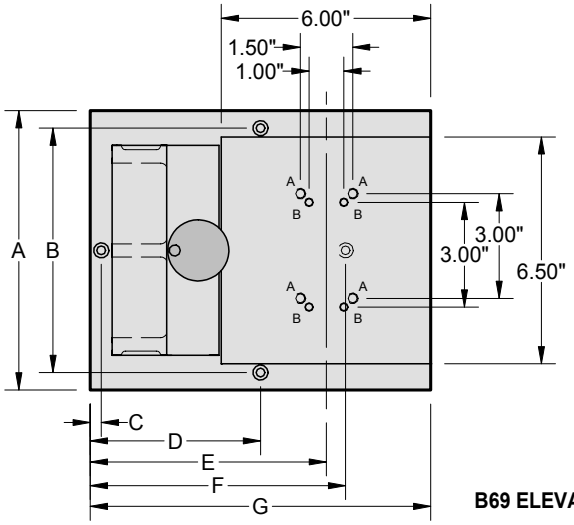

Elevating Tables are available in plain or Black Anodized finishes, with finer pitch lead screws, with Graduated Knob position readout, and with longer travel distances.

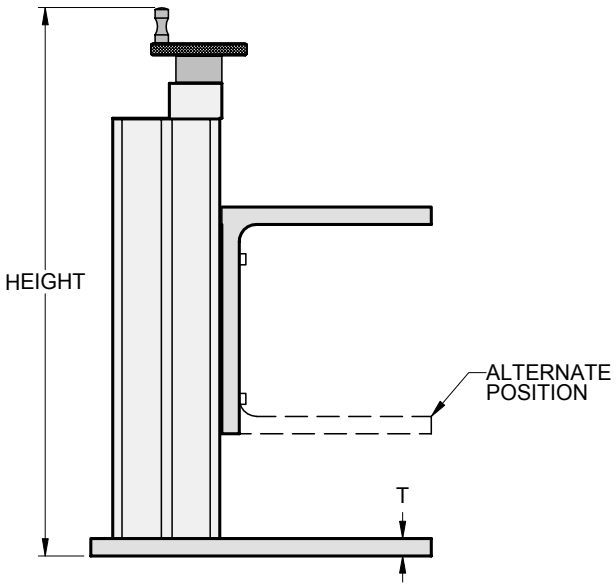

A. 5/16-18 UNC THRU
B. 1/4-20 UNC THRU
C. 10-32 UNF THRU
D. 8-32 UNF THRU

B69 ELEVATING TABLE

UniSlide A39 Series Elevating Tables

With these tables, the space above and around the table top is unobstructed. Our design provides a stable platform with a large thumb wheel for moving small loads. Central load capacity is 25 lbs. The standard lead screw is 3/8-20 double lead Acme, with a lead of 0.100". Other lead screws are available, please consult factory. Options include dual locking screw and black anodized finish.

Model Number	Retracted Height	Vertical Travel
A3901W1	2.25"	1.00"
A3903W1	4.50"	3.25"

Note: This drawing shows table with optional locking screws.
