Two-Device 1U Rugged Rack Mount

Holds One or Two KG-250s or IPS-250s

Rugged 1U enclosure can hold up to two AltaSec® KG-250 and/or IPS-250 INEs side-by-side.

The two-device rugged rack mount from ViaSat is designed to house up to two AltaSec KG-250 and/or IPS-250 IP encryptors in a 1U (1.75 in) enclosure for standard 19-inch equipment rack installation. The enclosure features smooth-sliding mounting rails that can lock at full extension for front access to the entire unit, enabling easy loading, unloading, and access to the devices inside. Slide rail extensions adapt for use in racks 18-24 inches deep. Designed to withstand the same environmental conditions as the KG-250, this rack mount can hold two KG-250s or similarly-sized devices, such as the IPS-250, Compact xPEP, or HAF-100, side-by-side. A front filler panel is included to cover an empty bay if only one device is installed.

The rear panel of the enclosure incorporates red (plaintext) and black (ciphertext) LAN double-shielded RJ-45 connectors and double-shielded CAT5 cables for 100 Base-T Ethernet. Ground studs on the inside and outside of the rear-panel facilitate grounding.

This rack mount includes a rear-panel filtered power entry module/circuit breaker and accepts installation of the standard AC adapter (power brick) and power cord that is supplied with the KG-250, IPS-250, Compact xPEP, and HAF-100. Cable tie wraps are included to secure the standard power supply, DC output cable, and Ethernet cables in the enclosure. Each power supply has its own front-panel on/off switch with power status indicator and guard to help prevent accidental activation.

SPECIFICATIONS

PHYSICAL CHARACTERISTICS

Dimensions (WHD) 17.06 x 1.75 x 18 in

Weight 13 lbs (without loaded devices or power supplies)

Environmental Specs Identical to those of KG-250

INPUT POWER

Voltage 100-240 VAC up to 2 Amp

Frequency 50/60 Hz

ORDERING INFORMATION

PART NUMBERS

Two-Device 1U Rugged Rack Mount 1123446

KG-250X Rack Mount Adapter Bracket 1103851

RACK MOUNT FEATURES
