VMM-D4 Four Channel Driver

Features

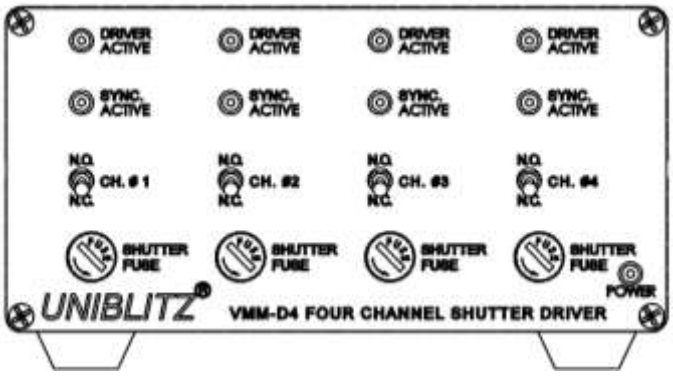

- The VMM-D4 is a four-channel shutter driver capable of controlling up to four *UNIBLITZ*® shutters independently.
- One input to trigger all shutters simultaneously
- LED Indicators for Power, Driver Active, and SYNC Active status
- Exposure determined by external pulse width, or switch contact closure.
- One output to monitor when all individual SYNC outputs are active.
- Manual open/close switch for each channel. Allows inverse shutter operation.
- Selectable pulse energy for operation of the 35, 45, 65 and 90mm shutter types.
- Separate fuse for each shutter channel.
- (Four) 710C shutter interconnect cables included

Drawings

Front Panel

Simple and straightforward controls allow the VMM-D4 to be easy to use and configure. LED indicators reveal each shutter's status at a glance. Four fuse holders with .6A slow blow fuses, accessible at the front panel for ease or replacement. N.O./N.C. switches allow manual shutter operation.

Rear Panel

All main input/output functions can be accessed at the VMM-D4 rear panel, including the 115/230VAC input. Manual switching as required. Additionally, (2) 6-pin pluggable terminal strips allow for easy termination to input (active high) and output (active low) signals.
