ORBITAL SHAKERS, OS-500

These economical, analogue shakers have two knobs on the front panel to control speed and time. Reproducible motion is evenly distributed to all samples through a counter-balanced eccentric drive mechanism. Shakers are supplied with a rubber pad, which sits on a 270x320 mm tray that rotates on heavy-duty sealed ball bearings and is powered by a 0.03 kW motor. Hardened enamel finish resists most abrasives and corrosives.

- Separate analogue controls for speed and time
- Can be operated in continuous or in timed mode from 1 min up to 2 h

Speed (min ⁻¹)	25 to 500
Orbit (mm)	19
Maximum Load (kg)	16
WxDxH (mm)	273x380x184
Weight (kg)	18

Ordering Information: Shakers can accommodate the 330x330 mm and the 450x450 mm steel platforms with enamel finish. The platforms are easy to attach to units and stay secure through vigorous shaking. The universal attachment is designed to hold a variety of vessels and measures 340x350 mm. Each unit is supplied complete with 3 plugs: EU, UK and CH for use throughout Europe.
