Acura® Variable Volume Multi-Channel Micropipettes

- 3-year wattanty including 2 years on the original calibration
- Hand piece rotates 360° for comfort or plate conformance
- Ideal for 96-well microassay plates
- Precision micrometer setting in 1 µl increments
- Easy simultaneous tip ejection

The multi-channel adjustable micropipette is ideally suited for use with standard 96-well microassay plates (9 mm spacing). The precision micrometer adjustment allows volume changes in increments of 1 µl. Hand warming is not a problem as the air chamber is located below the hand grip area. An overshoot movement flushes the tip empty and the micropipettes are equipped with a tip ejector which detaches all tips simultaneously. Each micropipette is individually calibrated and is supplied with a certificate of calibration. Not autoclavable.
