ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

YASKAWA
Energy In Motion™

SMC-2000 Single-Axis Motion Controller

The SMC-2000 single-axis motion controller is packaged for stand-alone operation. Features include: coordinated motion profiling, programmable and dedicated digital 24VDC I/O, analog inputs, and non-volatile memory for stand-alone operation. Two RS-232/RS-422 communication ports are available for interfacing with a PC, PLC and Operator Interface.

Superior performance capabilities include:

- 32-bit microprocessor
- 8 MHz encoder input frequency
- 16-bit DAC output resolution
- Multi-tasking up to 4 programs
- Position accuracy of +/-1 quadrature count.

This powerful controller provides several modes of motion control, including point-to-point positioning and electronic line shafting.

The SMC-2000's polarized connectors and pre-wired cables allow simple plug and play connection to any Yaskawa servo.

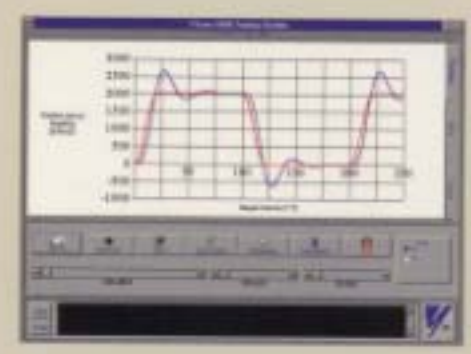

In addition to its full range of powerful features, programming is made easy with the use of "YTerm-2000", Yaskawa's Windows®-based software for programming, set-up and troubleshooting.

YTerm-2000 features:

- Dual programming screens
- Auto-tuning and graphical manual tuning
- System monitoring screens
- Context-sensitive help
- Direct access to SMC-2000

Programming tools include 147 simple instructions with up to 254 user-defined variables. Position, torque, velocity and other system variables can be used and changed dynamically within the program.

For economical system configuration, the SMC-2000 is also designed in two, four and eight-axis configurations. Dual encoder inputs allow for backlash compensation or electronic gearing from an external source.

YASKAWA
Energy In Motion™

SMC-2000 Single-Axis Specifications

Minimum Servo Loop Update Time:	250 µsec
Additional Encoder	8 MHz
Position Latch Speed:	25 µsec
Position Accuracy:	+/- 1 quadrature count
Phase-locked Accuracy:	Maximum 0.003%
Multi-tasking Capability:	Up to 4 programs
Inputs/Outputs (24VDC):	8 inputs/8 outputs
Extended I/O Option:	40 in/42 out (dry contact 1.25 Amp max carry)
Absolute Encoder Option:	8-axes supported
Dedicated Inputs:	Home and Limit Switches
Analog Inputs:	7 @ 14-bit/1.2mV Resolution +/- 10V
Power Supply:	Single-Phase 90 to 260 VAC 50/60 Hz
Position Range:	+/- 2147483647 counts per move
Velocity Range:	Up to 8,000,000 counts/sec.
Velocity Resolution:	2 counts/sec.
Motor Command Resolution:	16-bit/305µV Resolution +/- 10V
Variable Range:	+/- 2 billion
Variable Resolution:	$1 \cdot 10^{-4}$
User-Definable Array Size:	8000 elements
Total Program Memory Size:	1000 lines x 80 characters
